Design · Build · Care

JomGarden strengths

Plant choices for your space

Plant production and sales connect plant selection with garden design and construction to suit your site.

Design, construction and horticulture

Our landscape, civil engineering and horticulture team connects design, construction and plant selection.

Work examples for your project

Examples include residential gardens, factory landscapes, living walls and irrigation at corporate sites such as PTT, Unilever, Siam Kubota and Central Chiangmai Airport.

Services

Services for your garden

From design and garden construction to garden systems, maintenance and plant services for organisations.

For different kinds of spaces

- Homes
- Projects & common areas
- Fuel stations
- Offices
- Factories
- Shopping centres

01 Design, build and consultancy

Plan planting, paths, stonework and places to relax around how the space is used.

02 Garden and lawn renovation

Prepare the site and soil, arrange planting beds and lay lawns.

03 Garden and tree care

Maintain lawns, prune plants and provide ongoing tree care.

04 Irrigation systems

Sprinklers, drip irrigation, pumps, valves and irrigation controls.

05 Waterfalls, fountains and lighting

Add focal points with water and lighting for paths, plants and places to relax.

06 Plants and living walls

Plant production and sales, with living wall installation services.

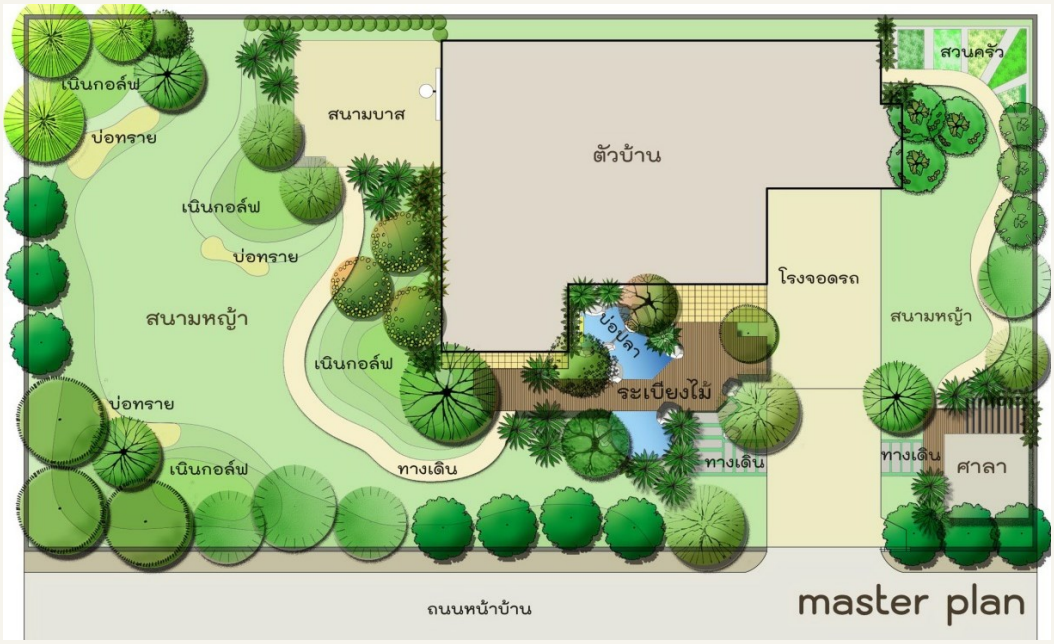

07 Indoor plant rental

Ornamental plant rental for offices and indoor spaces.

Design example

See the garden before work begins

The Khlong 10 design example uses a garden plan and perspective views to show the arrangement of elements and communicate the concept for the space.

Working together

From your ideas to a garden you can use

Develop the details together, from the needs of the space to landscape work and garden care.

01

Discuss and understand the site

Start with the location, site size, intended use and the garden style you want.

02

Develop the garden ideas

Consider planting, materials, paths, water features and lighting in relation to the space.

03

Set out the work and plan

Outline the work items, budget and timing so you can plan clearly.

04

Carry out and coordinate the work

Coordinate planting, construction and related systems as the work progresses.

05

Review the work and care

Review the work items together and discuss care suited to the planting and site.

Key details before work begins

- Planting and materials suited to the site
- Work items, budget and schedule
- Handover and garden care

Warranty terms depend on the nature of the work and are detailed in each project's quotation or contract.

Selected work / 01

A garden retreat in Khao Yai

Khao Yai · Pak Chong

Residential garden

This residential garden connects the lawn, paths and places to relax. Layers of planting create atmosphere around the home, complemented by garden lighting after dusk.

Our scope in this project

- Lawns and paths that connect the space
- Layers of planting around the home
- Garden atmosphere and evening lighting

Details from the site

A garden retreat in Khao Yai

Lawn and planted borders

Paths connecting garden corners

Green spaces around the home

Garden and evening lighting

Selected work / 02

A tropical garden for everyday living

Bang Na

Residential garden

Curving paths connect the side of the home with the lawn and planting beds. Foliage plants, shrubs and ground cover create layers of green, while an aquatic-plant pond adds detail to the front garden.

Our scope in this project

- Curving paths and lawn
- Layers of tropical planting
- An aquatic-plant pond beside usable space

Details from the site

A tropical garden for everyday living

Curved planting bed around a large tree and foliage beside the home

Lawn with a curved edge

Layers of planting and ground cover

Aquatic-plant pond and front garden path

Selected work / 03

The Icon landscape

The Icon Pradok 3

Water wall and catch basin

Development landscape

Planting and lawn,
alongside stonework and water features

Our scope in this project

- Planting and lawn
- Stonework and water features

Planting and lawn within the development

Selected work / 04

Stone and water in a business setting

PTT Life Station · Wang Chan, Rayong

Fuel-station landscape

Rockwork and water features at PTT Life Station in Wang Chan, Rayong show the materials, forms and arrangement of landscape elements in a business setting.

Our scope in this project

- Rock elements in the landscape
- Waterfall and catch basin
- Construction details and related systems
